

# The Zelda Pump

Save money pumping in 1/3 of the time providing 3 times the volume.

Our drive unit coupled with Zelda HVLS provides unmatched service. Operating in a forward or reverse direction we can evacuate all services lines when system is not in use.

Water & Chemical Transfer Pumping

Ability to prime and work in parallel with existing systems. Be able to reach the required resources when you need them! Irrigation made easy.

Self Priming at 400 US Gallons per minute, access to resources in seconds.

Self-Prime / Lift / Vacuum Pumping

Transfer chemicals to your sprayer, water for irrigation and much more.

Self Priming and access to resources when other pumps fail.

Multiple drive platforms to suite your needs.

On & Off Site Pumping

**Save money pumping in 1/3 of the time providing 3X the volume!**
