

WindTrans Systems Ltd has extensively tested Zelda with the help of McMaster University and Conestoga College. A number of projects analysing flow, testing longevity, efficiencies and other tests have enabled us to produce a pump like no other pump on the market today.

Running Zelda at a low rpm we can deliver high volume output along with being able to produce a complete vacuum allowing a self-priming and lifting capability like no other pump.

## Self-Priming & Lift: Pumping Water

Able to self-prime and lift a full atmosphere (+27') in under 12 seconds after deployment.

## PTO Pumping

## Power Pumping & Priming

## Portable Quick Setup

## Basement Pumping

Quick and easy even when you have lost connection to your electrical grid!

PTO Drive

## Custom Drive Systems

### Power Drive Systems

- 6HP Gas Drive
- 9HP Gas Drive
- Hydraulic Drive
- PTO Drive

Hand driven crank c/w stand.

6HP & 9HP Gas Drive

Hydraulic Drive

# Fire & Flood Control

The Only HVLS Pump

- Transfer water from any reservoir fast!
- Minimal force
- No Electrical grid hookup required
- Mobile systems available
- Prime assist emergency vehicles

# Zelda HVLS Pump

- 100 gal/min by hand
- 300 gal/min at 200 RPM
- Lifts 14' by hand
- Can be operated in forward or reverse to flush a plugged intake
- Emergency flood control

Sales Reps & Dealers Wanted

Mobile pumping systems for quick and easy access to constrained areas.
